

# Progress of Year 7 Numeracy Catch-up students (2018-19) indicated by the Summer round of Year 7 tracking

## Context

There were 78 (28%) students who entered Year 7 in September 2018 below the National Standard of 100 in Mathematics against 24 % nationally and 28% across Doncaster.

## Summary of Findings (see next page)

For comparison the figures in (brackets) are for Catch-up students for academic year 2017-18.

- Progress All students -0.11
- Progress Catch up students -0.29
- The gap in progress of Y7 Catch-up students -0.18 (-1.21).

### Priority sub-groups.

- The gap in progress of Y7 Pupil Premium Catch-up students 0.10 (-0.08).
- The gap in progress of Y7 EAL Catch-up students -0.20 (-1.07).
- The gap in progress of Y7 SEN Catch-up students -0.27 (-1.46).

## Limitation

There are limitations of this study.

- It is based on tracking data rather than actual results.

## Points for further consideration

Strategies to further consider to increase progress are:

- Not all eligible Y7 Catch-up students received additional targeted intervention.
- Continue to encourage period 6 intervention for one-one tuition. This proved very successful, utilising Y12 A-Level Mathematics students to deliver one-one support for 1 hour weekly.
- The appointment of a Maths TA to deliver targeted intervention would improve take up.
- Further work is needed to develop KS2 QLA to drive students individualised intervention sessions.
